I would like to submit the following comment in advance of tomorrow's City Council meetings, as I am unlikely to be able to attend. This comment pertains to the topic of energy aggregation.

-

Dear City Council, Manager, and Staff:

I am a member of Sustainable Delaware Ohio, a local group that advocates for the long-term environmental, social, and economic sustainability of our area. We have been involved in discussions regarding the city's energy aggregation for many years and were thrilled when our community adopted 100% renewable energy aggregation as its default option. It is now time to enter into a new aggregation agreement. In alignment with our mission, our members would like to see renewable energy promoted in the city now and in the future. We understand, however, that the prices are not as favorable as in past years and we respect the City Manager's difficult choice in this case. We hope that next year's numbers look more favorable and ask to be included in discussions leading up to the decision. If the renewable option is not selected as the default in this instance, we would like see the city promote the renewable option through mailings, social media, and other means in order to make residents aware of its existence and benefits, as well as simple instructions on how to opt in to the renewable option

Thank you,
Anna Willow
56 Lobdell Drive.
