I think a race track is a great idea. I've been into cars for years and there's no local track close to us that's why you see a lot of illegal street racing around here. Adding a track here is the perfect idea and would cut back on people illegally street racing if there's a track right up the street. There is already explosions in the area weekly from the quarry. So sound shouldn't be a big deal. I hope this passes and we eventually get a track to race at. It would be huge for the city there's so many people i know into cars that would be at the track all the time having fun.
