You don't often get email from baker.alison96@gmail.com. Learn why this is important

Hello Sarah,
My husband and I would like to submit public comments for the Parking & Safety meeting on 2/24/26.

We are unable to attend as we have two small kids, but would like to express our support and appreciation for making this change! We have been residents on Dogwood for 5 years and have always been frustrated with the cars parked on the street & the impact this has on the safety of the road. We have always worried about the kids who play in the neighborhood, who often run out between cars. Now that we have children of our own, having a clear and safe street is even more at front of mind. Just a few weeks ago, we narrowly avoided a head on collision with an oncoming car who was not paying attention to the narrowed roads after speeding around the corner. The situation was made worse by the ice on the road- a result of the poor plowing & salting that happens when cars prevent the plow trucks & drivers from effectively doing their job! In addition to the damage that could have happened to the parked cars, our entire family of 4 was in our car and could have been physically harmed. We strongly feel the entire situation could have been avoided if cars were not parked on both sides of the street! Allowing cars to be parked on one side is a reasonable compromise for the families with multiple cars who need the additional space (although we also hope residents will consider parking in their drive as a first resort rather than last!). For the safety of our kids and our families on Dogwood Drive, please approve this change!

Thank you,
Philip & Alison Verdes
