Hello,

I am a resident who lives on Dogwood Drive and I'm reaching out to show my support for implementing parking on only the North side of the street.

As someone who lives on this street, we struggle, almost daily, to get down our road with the double parking that occurs on both sides of the street. Our road is narrow so when people park on both sides of the street it makes an already narrow road, even more narrow and very difficult to get down. We also have 2 curves on our road and these are almost always taken over by parking on both sides so being able to see what's coming the other way toward you is almost impossible. You just have to take a chance!

Being in a neighborhood with children all around I have reached out many times to both our homeowners association as well as the city to get some sort of change to make our road both safer and easier to get down, but have always been told nothing can be done. To say I'm beyond happy this is finally being considered is an understatement. The parking on both sides of the street make it extremely difficult for school buses to get down and if a fire truck ever needed to get down our road to assist a resident I don't think they would be able to. This is unsafe! I know our garages are not true 2 car garages and that many people have children adding to other things in their garage or their children are old enough to drive adding to more cars, but I think there is room for residents to be more considerate of neighbors and the overall safety of everyone on Dogwood Drive. For all these reasons and more we are strongly for the implementation of parking only allowed on the North side of Dogwood Drive.

I want to thank everyone for their time and attention to this matter that truly is a huge safety concern and something that needs to be addressed.

Thank you,
Chris and Kacy Haser
Dogwood Drive Resident
