You don't often get email from mendiew@yahoo.com. Learn why this is important

We live at 147 1/2 E winter st
We have live here since 2014
The parking that you plan to remove is been our parking and previous tenants parking for yrs ...
It has never been an issue
Until common ground couldn't get the handicap removed on winter st ...
We have offered them to park there they in fact told us no we like the autozone parking lot
In fact cars park on both sides of the street without a problem.
..where are you going to have residents park if we can not park where we have been for 12 yrs ?
Common ground has never received or raised the money needed to build there building
So putting parking on there side ...is it public parking ?
Or there parking ?
To take away from tenants who pay top dollar to live where we live ..
To accommodate something that's not even i. The works yet seems a little unjustified...
We load and unload on our side of the st
We have a dog who goes with and to have to cross rhe st to load and unload with the traffic that the city has cause because of road shut down isnt safe ...
We have watched accidents and ppl running the stop sign ....
Pl e are dont take our parking away ...
If its not broken dont fix it ...
And its not broken
Its a power trip
By common ground to remove our cars ..
And if you do put parking on that side it will be an issue for the ppl who live at the same location as co.mon ground ..
There is always a back up on the st and alley because they always have cars stopping and unloading 9 mins each vehicle, to where it cause a traffic flow issue
The police have been there alot to let them know they can not block the right of way ...
But they chose to do what they want and who cares how it effects others
