EXPLANATION.

Inter-county highways are shown on this map by heavy lines and by their official names and numbers. Improvements on inter-county highways built by the State, or "taken over" by the State, are maintained by the State as "State roads." County road improvements, on inter-county highways, and other county roads, are maintained by the counties; and township roads on inter-county highways, and other township roads, are maintained by the townships.

DELAWARE COUNTY

Scale, one inch equals two miles

Orange lines indicate macadam roads

Blue lines indicate gravel roads

Red lines indicate brick roads, except inside of corporations where red lines indicate the most traveled routes

Brown lines indicate Portland cement concrete roads
