Sarah

Can this be presented to Council at the next meeting?
I would like to also k now when it could be put on the agenda for Council to discuss in an open meeting.

The issue is the 2026 changes to the residential consumption and rates applied to the usage.
For example:

My July Bill is $220.31 total consumption 32
0-2 $0
2-6 $4.08 = $16.32
6-10 $6.12 = $24.48
> 10 $8.16 = $179.52
Total $220.32

Commercial with same amount of usage.
2-30 $4.08 = $122.40

An increase in residential costs of $97.92
According to the chart provided to me by Kevin Rider
this affected 7,767 residential customers in June of 2026.

Have communicated via e-mail several times with Kevin looking for answers and how this percentage difference is even justifiable. Council should not apply rates to residential customers that are radically inflated versus commercial rates.
